

TEMPLANT

POWER

The Mayor's Thames Festival | London

The Mayor's Thames Festival is London's only river-focused multi-arts festival and is one of the largest of its kind in the world, promoting activities that reach up to the source of the Thames and down to its mouth.

For the first time the festival extended across a two week period and London's iconic river was brought to life through new creative commissions, river events, a diverse range of live music, educational events and many exciting activities to connect, involve, inspire and entice people down to the river and onto its waters.

Templant were incredibly pleased to be successful in their tender for the supply of temporary power during both weekends of the festival.

2 x 20kva generators were supplied, delivered and set up each weekend and due to the importance of a constant power supply Templant were also asked to provide two Engineers to stay onsite for the duration of the generator rental. This was a precautionary measure to absolutely guarantee that in the unlikely event of a generator overload there would be an immediate solution.

Client Comment:

"Just a note to say many thanks to you for the service provided to the festival which was really good.

Dan and Chris were both helpful, efficient and a pleasure to work with. I look forward to the next project."
