

Savings are delivered via fuel efficiency, often as much as 70%, reducing on-site emissions and providing a greater number of applications. These units vastly increase flexibility for site infrastructure set ups and can completely alleviate environmental problems associated with working in densely populated area.

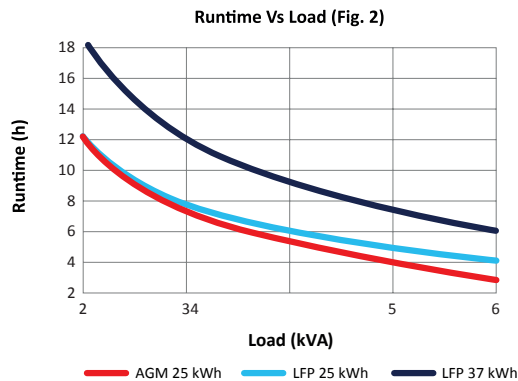

HYBRID POWER

BENEFITS

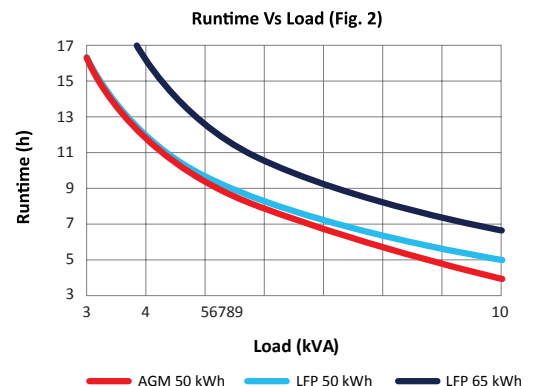

- + Reduce diesel fuel consumption
- + Reduce diesel generator runtime
- + Reduce CO2 and NOx emissions
- + Provides an uninterrupted power supply
- + Silent power - ideal for overnight power
- + Reduce diesel generator maintenance

APPLICATIONS

- + Base Load Management
- + UPS
- + Off Grid Power
- + Cabins
- + Welfare
- + Security and CCTV
