

Overview of the Utilities Contract

Templant to deliver industry-leading emergency response and power solutions with a commitment to reliability, innovation, and sustainability over the next 3 years. We strive to exceed customer expectations through superior service, cutting-edge technology, and unwavering dedication to environmental stewardship.

Why This Matters:

This contract solidifies Templant's position as a trusted provider of responsive and sustainable power solutions for critical sites. The 2-hour response commitment and our excellence in service set a high standard, ensuring that we can deliver peace of mind to clients across the utilities sector, critical sites, and beyond. These standards act as a benchmark for future opportunities, proving our ability to meet demanding service requirements and environmental goals.

Our Responsibilities

Dedicated Fleet for Immediate Deployment - Maintained a dedicated fleet of fully serviced and operational equipment, ready for immediate deployment across multiple sites, supported by our in-house, 24/7 on-call transport team.

Comprehensive 24/7 Support - Provide 24/7 support, 365 days a year, ensuring uninterrupted service for critical sites. This ensures that essential operations remain powered and secure.

Remote Monitoring & Maintenance - Ensure performance of our on-site generators with remote monitoring, allowing for real-time tracking of generator location and potential issues, such as fuel levels. We maintain the highest standards through regular 500-hour service intervals, ensuring reliability and efficiency at all times.

Specialised Training & Rapid Response - Ensure our staff receive continuous education through comprehensive training programs, with a focus on technical expertise and familiarity with E+S water infrastructure. All personnel are certified with Blue Card EUSR accreditation.

24/7 Service Helpline

2-Hour Response Time

In-House Logistics

Sustainable Power Solutions
